Red River Reclaimed Flooring

In March of 2016, Montimber International LLC's subsidiary Delta Forest Products LLC experienced a 100 year flooding event which flooded much of the facilities in 6 feet of water. The bundles of materials were recovered and reprocessed and eventually milled to become a new custom flooring line. This line has a combination of locally sourced hardwoods, exotic species, and pine woods.

Widths: 2 1/4 up to 5 1/4 widths

Lengths: to 7 feet and longer

Grades: All grades are included from clears to sound tight knots and other characteristics that define the beauty of this product.

Species: Separated or occasionally mixed.

We may source new hardwoods from time to time so if there is a type you would like, ask us about it.
