

BEST DEAL MILLWORKS

*We Create an Appealing  
First Impression for your  
Home or Business*

Best Deal Millworks is a custom doors and windows company producing the highest quality custom wood doors, windows, and other specialty millwork. We create a "first impression" for your home or business.

# Beautifully Designed with you in Mind

Every time you look through a vinyl window, the world comes to life. Our windows are uniquely designed to fit the way you live, blending advanced technology with innovative features that add beauty and value to your home.

## Clean With Ease from the Inside Out

The tilt-in sashes on our double-hung make cleaning from indoors a snap.

## The Strongest Vinyl Frames

Fusion-welded corners and a multiple hollow chamber design build strength and structural integrity directly into every vinyl window we manufacture.

## Paint, Stain, Varnish: Good-Bye.

Integral color throughout the vinyl creates a lasting finish that never needs painting. The vinyl in our windows will never chip, peel, or crack - guaranteed!

## Energy-Efficient

Our multiple hollow chamber design produces a thermally efficient frame with superior resistance to heat transfer.

## Feel Safe and Secure

Our dual positive-action cam locks ensures a weather-tight seal and added security.

## Installation Made Easy

Our windows are designed for easy installation. Each window is custom-made to your exact window openings, eliminating extensive renovating costs.

## Stay Protected from Wind and Water

Interlocking sashes on our windows provide maximum protection from wind and water penetration.

## Window Style Options

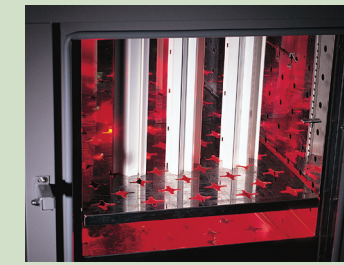

Available in single pocket slider, picture, single and double hung.

## Lasting Durability

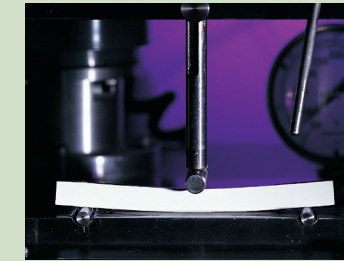

Because our proprietary vinyl is formulated to withstand multiple quality assurance tests and real world testing, Mikron vinyl windows meet or exceed strict industry standards, so you can be assured of their lasting durability.

With years of real outdoor performance experience, our vinyl is proven to be colorfast in the toughest high-heat and high humidity environments.

Fusion-welded corners add strength and ensures weather ability. The low maintenance vinyl won't rust, corrode, pit, rot, peel or flake. The color of the window is fully integrated throughout the frame, and will never need painting. Just use soap and water to keep your vinyl windows looking clean.

AAMA Temperature Deflection Test

AAMA Weatherability Test

Other vinyl allows too much harmful ultraviolet light to penetrate.

Mikron vinyl is more opaque and allows less harmful ultraviolet light penetration.

# The Difference is in the Spacer

## THE DURALITE WARM-EDGE SYSTEM

In addition to a superior energy-efficient frame system, Best Deal Millworks uses the best thermal performing spacer in its class. Among the other high-performance components that make the Mikron Window the best in its class are the spacers that separate multiple panes of glass in the window's construction.

Duralite™ next-generation spacer with warm-edge technology uses no metal. It substitutes metal with a unique laminated composite. As a result, Duralite reduces thermal conductivity up to 45 percent.

When compared with other spacers, Duralite offers the lowest U-Value rating, the best condensation resistance, and is the best energy-efficient spacer system available.

**Duralite spacers perform better in U-value tests than any other spacer.**

<b>Duralite™</b>	<b>-30</b>
<b>Duraseal™</b>	<b>-31</b>
<b>SuperSpacer®</b>	<b>-31</b>
<b>Intercept®</b>	<b>-32</b>
<b>Aluminum Spacer Bar</b>	<b>-34</b>

**The lower the U-value, the better the energy efficiency.**

- No Metal (no thermal short-circuit)
- 60% Air (insulates better)
- Fights Conduction and Convection
- Laminated Barrier (impermeable to moisture vapor and gas molecules)
- Spacer Conductivity (condensation)
- Low-profile design (better thermals)
- No secondary seal (better thermals)
- Spacer and Frame: True System
- Less Conductive
- Butyl Adhesive Best to Insulate
- ~50% of R-5 Certified Window Producers use Duralite®
